Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Obara et al.

Obara et al disclose an image forming apparatus comprising an image recording portion 21 for recording an image on a sheet; a sheet stacking portion 36 provided above the image recording portion on which the sheet delivered from the image recording portion is stacked; an image reading portion 5 provided above the sheet stacking portion; wherein the image reading portion is disposed on a rear side so that the sheet delivered from the image recording portion onto the sheet stacking portion is partially exposed to the outside on a front side of the image reading portion (Figs. 1 & 3).

Obara et al further disclose an operation portion 45 disposed on the front side of the image reading portion and on an upstream side with respect to a direction in which the sheet is delivered.

Allowable Subject Matter

3. Claims 7-18 are allowed.

Art Unit: 2852

4. Claims 3-6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5. The following is a statement of reasons for the indication of allowable subject matter: None of the prior art of record teaches a supporting frame positioned on an upstream side of a recording portion frame with respect to a direction of the delivered sheet, a reinforcement member for reinforcing the supporting frame and is provided on a downstream side of the supporting frame, and a casing is provided close to area side of the supporting frame with respect to claims 3-6 and a first circuit board disposed inside the image forming apparatus and below an operation portion, a second circuit board disposed on a front side inside the image forming apparatus and below the operation portion, and a first connecting member provided on the front side to electrically connects the first circuit with the second circuit board with respect to claims 7-18.
